

Wardrobe System in Black Color

Exclusively designed for your home

- Functional and practical storage system
- Fashion, elegance and strength of black metal
- Its minimalistic design is tailor-made for lofts and modern interiors
- Perfect fit for wooden décor - harmonious and fashionable combination of cold metal and warm wood

EXCLUSIVE!
Only by ARISTO

- Deep matt black
- Pleasant and smooth surface
- Durable coating technology, originating from the automotive industry

Walk-in Closet

Create it by yourself and match your unique ideas of fashion

- Long dresses are in vogue? Just change the shelves!
- Light shelves, easy to carry by anyone.
- You can change the location of the shelves and elements depending on the season, new clothes or just your current mood.
- Clothes stay in their place and won't be lost.
- You can always add more elements to expand your possibilities.
- Universal elements always fit to your unique project and are always kept in stock.

Garage

Guaranteed reliability and durability

- You can move the shelves depending on the season - in summer you may store sleds, skis, winter tires - in winter a bicycle and summer tires; and if anything does not fit, you can easily move the shelves and elements.
- Heavy drills and tools, bags of cement, soil and cans of paint - you can rely on the strength of the system: each shelf can carry up to 40 kg.
- No need to look for your lost tools anymore: each item has its own place - use a wire shelf divider that nothing falls down and for creating sections.

Cabinet

Individuality for your cabinet

- No more standard cabinets - the location of different shelves, rods and other elements is selected only by you.
- Full functionality of a dressing room: multi-level rods, pull-out baskets, trousers racks, tie holders, shoe racks, etc.
- Wire shelves allow for easy visibility, therefore storage is more comfortable than with solid shelves - finding all your items could not be any easier.
- Wire shelves allow for the inflow of air; clothes remain fresh and mold won't spread

Niches

Utilising every corner of your apartment

- Any niche can become more useful if equipped with multi-functional elements.
- The purpose of a niche can always be reconsidered: it can be equipped with new elements or old ones can be moved.
- Wire shelves support ventilation, allowing you to keep clothes or products fresh - plus zero emission of smells and formaldehydes, unlike shelves made of chipboard.

Loggia

Maximalizing minimalism

- Whether it is a workplace, a winter garden or a small storage room: a loggia is a matter of personal preference and our system allows for ultra-compact storage, regardless of the location.
- The system does not demand too much from the walls: the entire load is evenly distributed throughout the rails and the wire shelves do not take up much space.
- The materials are able to deal with changes in temperature, humidity and all the seasons: the resistant polymer-powder coating protects from rust and won't tarnish.

Attic

Adapt to different surroundings

- It is easy to equip a non-standard room - no need to order any customized built-in furniture.
- Different types of fasteners allow you to compensate the roof bevel, making more use of the space under the windows.

Storage room

The things are in order without any mess

- Sorting the things: clothes to baskets, food to the shelves.
- Don't need to seek for anything! Open storage provides hassle free access.
- Bought a lot on sale and there is no place to put everything? Change the height of the shelves to the size of the containers and boxes.
- Reliable shelves; keep your canned food for the whole winter time.
- Easy to clean: if something is spilled or scattered, remove it with wet tissue.

Accessories Shelf

- Small compartments are ideal for storing various accessories.
- Soft fabric on the inside protects all items from damage.
- Pull-out mechanism with soft closing opens easily and closes tightly.

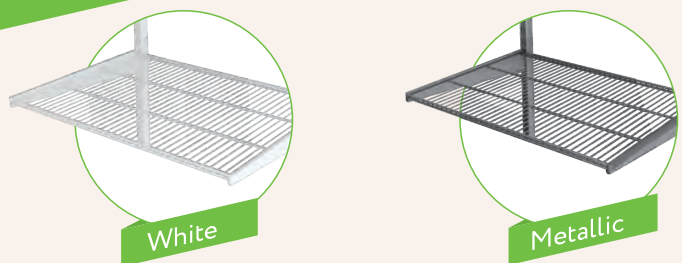

Why ARISTO?

- We know everything about storage systems and customer preferences, thanks to our 15 years of experience.
